Chattanooga, TN 37405

Dear June:

As the Operations Director here at Chattanooga Natural Medicine Center, I am pleased to have incorporated two ionic detox machines from Stillpoint, into our practice as part of a comprehensive approach to the patient care. The use of these two machines has provided a simple but extremely effective hydrotherapy detox method for our natural medicine patients.

I appreciate, as do our doctors and staff, the fact that the machines are simple to operate, required very little training and involve minimal oversight when in use. The individual staff member responsible for the detox process also works with the front desk receptionist, escorts patients to their treatment rooms and still oversees two detox patients simultaneously. The other tasks she performs could not be done were this a time consuming duty for her.

The cost of the footbath through Stillpoint proved to be very competitive. I value the fact, too, that you have two offices here in Chattanooga, making access to you for service easy.

Besides the initial purchase, replacement arrays, the length of time they are effective, their cost and their availability were a concern. The arrays you have provided have lasted a reasonable period of time with only one exception. In that case, you certainly came through in replacing it, ensuring excellent customer service. The cost of the arrays has been competitive, as were the machines themselves. Their availability and knowing that they fit the equipment is another reason to do business with your company. (I understand from other business owners, who have purchased similar equipment that they have been shocked to find them no longer available).

You will be hearing from me again soon as we add to our detox equipment inventory.

Most sincerely,

Becki Patterson
Director of Operation
